SysEng 6104 Project Task VI

Level-2 System Architecture

1. Using the solution-neutral functional intent architecture that you have developed in project task V and going over the questions given in Table 8.1 on page 161 of text, develop the following artifacts for your system;

    a. Partial architecture of the primary value delivery of your system similar to Figure 8.1 on page 162 of text.

    b. Partial architecture of the primary and secondary value delivery of your system similar to Figure 8.2 on page 163 of text.

    c. Using the reasoning process given in Figure 8.3 on page 165 of text develop a level-2 architecture for your system and provide similar tables given on page 168 (Table 8.2) and on page 169 (Table 8.3) for your system.
